You provided me, with two mail. And that was-

- robintrends5@gmail.com
- rsgreencafe@gmail.com

Step 1: After getting that two mail, I first identified, by which device would continue these two mail.

And I got that with some trick-

Account recovery

To help keep your account safe, Google wants to make sure it's really you trying to sign in

 robintrends5@gmail.com ▼

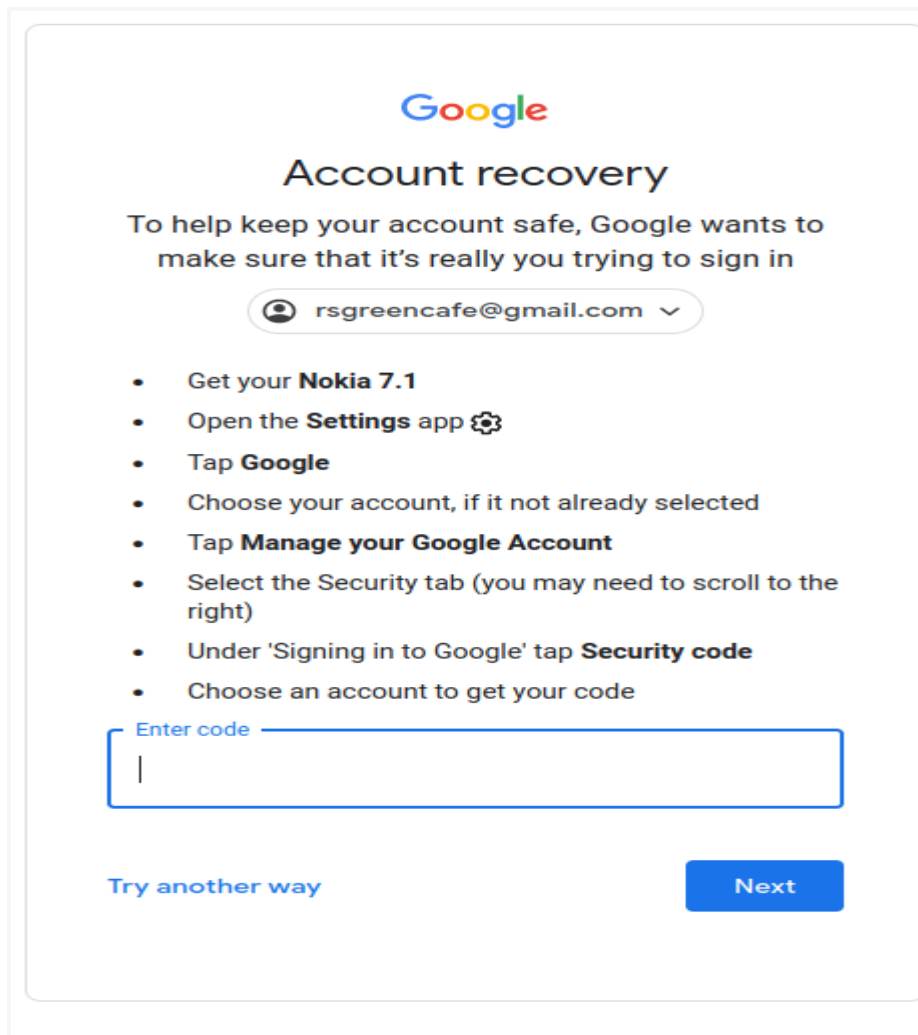

- Get your **Nokia 7.1**
- Open the **Settings** app 
- Tap **Google**
- Choose your account, if it not already selected
- Tap **Manage your Google Account**
- Select the Security tab (you may need to scroll to the right)
- Under "Signing in to Google" tap **Security code**
- Choose an account to get your code

Enter code

A screenshot of the Google Account recovery interface. At the top is the Google logo. Below it is the heading "Account recovery". A message states: "To help keep your account safe, Google wants to make sure that it's really you trying to sign in". Below this is a dropdown menu showing the email address "rsgreencafe@gmail.com" with a downward arrow. A list of instructions follows: "Get your Nokia 7.1", "Open the Settings app" (with a gear icon), "Tap Google", "Choose your account, if it not already selected", "Tap Manage your Google Account", "Select the Security tab (you may need to scroll to the right)", "Under 'Signing in to Google' tap Security code", and "Choose an account to get your code". Below the instructions is a text input field with the placeholder "Enter code" and a single vertical line cursor. At the bottom left is a link "Try another way" and at the bottom right is a blue button labeled "Next".

Here we can see that both emails are continued at Nokia 7.1

So, undoubtedly we can say that both email's author is the same.

Step 2: After searching for, minimum dozen of tools, finally I found something necessary from Ghunt or Gmail hunt Kali Linux tools.

Here I got some important information and that is name and google calendar link.

Name: Robin

Google calendar:

<https://calendar.google.com/calendar/u/0/embed?src=robintrends5@gmail.com&pli=1>

Step 3: Let's go to the google calendar link.

Oh no! Here I have no permission. But, nothing to worry about. I have permission to see the page source and inspect the element.

Step 4: Let's check the Inspect element. And click the network option.

Let's see what I found.

Here I got 4 IPs. But we know a device has only one IP. But why here have four? Well, there are four devices that continue this email. Just like your mobile, personal laptop, or office/shop desktop sometimes use the same email.

Here the four IP was:

- 142.250.183.238
- 142.250.182.78
- 142.250.206.110
- 142.250.182.67

Step 5: Let's Identify the IP tracker tool's validity with my IP.

We can say that all IPs have located in the same location.

- Country: India
- Region: Tamil Nadu
- City: Chennai
- Latitude: 13.0827
- Longitude: 80.2707

And the geo-location is-

I found one different location by out of four. And that was-

- Country: India
- Region: Delhi
- City : New Delhi

Maybe that will be his office or working station.
